

The Clinical Neuropsychologist Journal

SACNA is pleased to announce that we as an organisation have again negotiated the purchase of online access to The Clinical Neuropsychologist, which is the official journal of the American Academy of Clinical Neuropsychology.

Quoting from the official website this is what you can expect to find in this journal

<http://www.tandfonline.com/action/aboutThisJournal?show=aimsScope&journalCode=ntcn20#.Uo9U7KUVrwI>

The purpose of The Clinical Neuropsychologist (TCN) is to provide in-depth discussions of matters germane to the practice of evidence-based clinical neuropsychology, spanning the age range from pediatric through adulthood.

The scientific knowledge base of clinical neuropsychology continues to expand rapidly. There is also a need for airing of models, concepts, and positions with regard to educational, clinical, and professional issues. TCN's primary mission is to share state-of-the-art scientific research related to practice and provide continuing education to practitioners, but is also designed to provide a forum for broader presentations and discussions relevant to current practice. Areas of coverage that are of particular interest are:

- Clinical research (including single and meta-analytic studies) pertaining to diagnosis, delineation of condition trajectory, and treatment outcomes
- Practice guidelines, consensus statements, and position papers that guide clinicians
- Randomized clinical trials
- Clinical case studies
- Reviews of clinical issues (including elucidation of new assessment, treatment, and measurement techniques)
- Forensic applications (including empirical research and discussion of topics unique to forensic practice)
- Professional issues (including credentialing, education and training, and ethical matters, as well as relevant surveys)

Online access to this journal will be available (free of charge) to all SACNA members who are fully paid up for 2016. All editions of the journal for 2016 will be available will remain accessible for a period of one year. This is a very unique opportunity for SACNA members to have access to very recent neuropsychological research, especially so for all private practitioners, who very seldom have such access or do so at very high costs. This is another way in which SACNA is attempting to link members of the professional neuropsychological community to resources, knowledge and expertise, promote interest in the field and ensure ongoing competence within the discipline as practiced in South Africa

In order to activate your access you need to send an email to Nicky Botha at info@sacna.co.za. Nicky will verify that your SACNA subscriptions are paid up and will then send you a voucher, which you can use to access the journal from your personal computer and feel free to make use of this offer and enjoy the academic reading!

BOOK REVIEWS (SOLICITED BY THE BOOK REVIEW SECTION EDITOR) ALL PUBLISHED RESEARCH ARTICLES IN THIS JOURNAL HAVE UNDERGONE RIGOROUS PEER REVIEW, BASED ON INITIAL EDITOR SCREENING AND ANONYMOUS REFEREEING BY INDEPENDENT EXPERT REFEREES.
